EndNote – how to set the preferences so that the Find Full Text function works

The WA Health Libraries Network has established a WA Health licence for EndNote. The Health Information Network (IT) can arrange to have this installed for you. However, you need to set some preferences in order to make use of the Find Full Text function within EndNote.

Note that ‘find full text’ will work well for many journals but will not work for some where full text access is in fact available. Some records will not contain enough information for the article to be retrieved (it’s important to import complete references), access to some titles may only be available via an aggregator and not from the publisher URL that comes with the record, and some journals need to be accessed via a path that includes a login and this cannot be incorporated into EndNote’s Find Full Text search.

Edit EndNote preferences once you have the program open.

Go to:
Edit
Preferences
URLs & Links

In the OpenURL Arguments box leave all of the information in the box as it is, except for one change at the beginning of the information.

Replace    ?sid=ISI:WOS    with    ?sid=ISI:endnote
Retain the tick beside Copy new file attachment to the default file attachment folder

Go to:
Edit
Preferences
Find Full Text

Tick all the boxes except for the ISI Web of Knowledge Full Text Links.

In the Authenticate with: box, type this URL  http://www.google.com.au/  [This step is not necessary for home installations – only required from within the WA Health network.]

In the OpenURL Path box, you need to put the link to your Library’s open URL resolver.

For Child & Adolescent Health Service Staff:
In the OpenURL Path, type (or copy and paste):
In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For Drug & Alcohol Office Staff:
In the OpenURL Path, type (or copy and paste):
In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/
For Department of Health (Royal St & Corporate) Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For Fremantle Hospital & Health Service Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For North Metropolitan Area Health Service Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For PathWest Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For Psychiatric Services Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/

For Royal Perth Hospital Staff:
   In the OpenURL Path, type (or copy and paste):
   In the Authenticate with URL, type (or copy and paste): http://www.google.com.au/
